Professional Summary

Junior Full-Stack Developer with hands-on experience building and deploying web applications using JavaScript, React, Node.js, Express.js, MongoDB, REST APIs, and GraphQL. Built production-oriented applications featuring authentication, authorization, external API integration, data processing, caching, rate limiting, automated testing, and responsive UI. Strong troubleshooting and systems background with experience diagnosing complex technical issues.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React, Vite, React Router, Tailwind CSS, React Hook Form, Zod, Responsive Design, Accessibility

Backend: Node.js, Express.js, REST APIs, GraphQL, MongoDB, Mongoose

Security: JWT, HTTP-only Cookies, bcrypt, Authentication, Authorization, Input Validation, CORS

Testing & Engineering: Automated Testing, API Testing, Caching, Rate Limiting, Data Processing, Error Handling

Tools & Deployment: Git, GitHub, Postman, Vercel, Render

Experience

Enoch Tech and Training Pvt Ltd.

Jan 2026 – Jul 2026

IT Support Engineer

- Provided technical support for hardware, software, network, and application issues while mentoring students on IT fundamentals and security best practices.
- Diagnosed multi-layer issues across operating systems, applications, and networks; installed, configured, and maintained IT infrastructure.
- Applied security practices and collaborated with the training team to improve troubleshooting workflows and operational efficiency.

VXI Global Solutions Pvt Ltd.

Sep 2024 – Aug 2025

Account Associate – Network & Technical Support

- Delivered Level 1/2 technical support for residential ISP accounts, diagnosing LAN/WAN, TCP/IP, IPv4, DNS, and DHCP issues using technical troubleshooting tools.
- Resolved account, billing, and connectivity incidents through Salesforce CRM and ticketing workflows, coordinating on-site technician dispatch when remote fixes were insufficient.

Projects

GitHub Dashboard – Developer Activity Analytics

[Live Demo](#) | [GitHub](#)

- Built and deployed a full-stack developer-activity dashboard with React, Vite, Node.js, and Express, integrating GitHub REST and GraphQL APIs for profile, repository, and contribution data.
- Developed contribution analytics for streaks, active weekdays/months, contribution gaps, activity patterns, repository language distribution, and 2–3 profile comparison.
- Implemented TTL caching and per-client rate limiting for GitHub API routes; added structured loading, error, empty, and validation states for resilient API-driven workflows.
- Built shared data-processing modules and automated tests for contribution normalization and analytics; deployed the production application on Render.

Relocation Budget – MERN Financial Planning Platform

[Live Demo](#) | [GitHub](#)

- Built and deployed a MERN application using React, Node.js, Express, MongoDB, and Mongoose for managing relocation budgets, expenses, currencies, and financial runway.
- Implemented JWT authentication with HTTP-only cookies, protected routes, user-scoped authorization, password hashing, and frontend/backend validation.
- Developed multi-currency budgeting across 7 currencies with exchange-rate integration, expense conversion, remaining-budget analysis, recurring expenses, and financial-runway calculations.
- Built reusable business-logic utilities and responsive UI, backed by 168 automated frontend and backend tests.

Education

Bachelor of Engineering – Information Technology

Sep 2019 – Jun 2023

Osmania University, Hyderabad, India
